

Product Options

25mm (13mm + 12mm) x 72" (1.83m) x 25LF (7.62m)
Custom roll lengths are available. Please contact your local representative to determine availability, pricing, minimums, and lead times.

Physical Data

PERFORMANCE CRITERIA	TEST	RESULT
Tuft Bind	ASTM D-1335	>8 Pounds
Tear Strength	ASTM D-5034	>200 Pounds
Lead Content	ASTM D-2765	<50 ppm
Total Yarn Linear Density	ASTM D-1577	8,4000 Denier
Yarn Breaking Strength	ASTM D-2256	>19 Pounds
Yarn Melting Point	ASTM D-7138	248° F
Flammability	ASTM D-2859	Pass

Can a turf surface allow you to leave it all on the field without taking home a shoe full of infill?

Yes.

Stacked Ultimate Turf

features a monofilament nylon turf with a textured thatch layer that offers a realistic grass surface fusion-bonded to a 12mm ShockPad. Loose rubber infill not required!

What does it take to be a floor?

- ✓ Durable
- ✓ Sustainable
- ✓ Affordable
- ✓ Ease of Maintenance
- ✓ Slip Resistant

Athletes will train and train some more. With repetition abuse becoming the norm, athletes require a turf that mitigates vertical and lateral force on the lower leg without the use of infill. This total Ultimate Turf system offers the epitome of shock attenuation and GMax attributes, which are desired in a synthetic turf installation for indoor applications, without the need for loose rubber infill.

Can a floor do more? Yes.

With the majority of training moving indoors and year round, Ultimate Turf offers impact absorption and allows the athletic to perform on the surface and not in it.
